Subject: WMD ozone approval

Hi Tom,

I was hoping to touch base with you about the action you were working on for the West Mojave Desert ozone plan. As you'll remember, we had a call towards the beginning of June with U.S. EPA, CARB, and the District to discuss questions you had around their RACM demonstration. At the time, I had noted that you needed to go back and look at the attachments that we included on our CARB Staff Report to see if they took care of what you were looking for, and we were going to discuss possibilities on our end for various things.

I left you a voicemail the other day because I wanted to circle back with you to see if you had an update after having reviewed those extra materials. I will be leaving by 2pm today and then will be out of the office until 8/13 – if you have a few minutes and could give me a call by 1:30 today, that would be great!

Thanks so much,

Ariel Fideldy
